National Numeracy Network

Vision Statement

The National Numeracy Network envisions a society in which all citizens possess the power and habit of mind to search out quantitative information, critique it, reflect upon it, and apply it in their public, personal and professional lives.

Mission Statement

The National Numeracy Network promotes education that integrates quantitative skills across all disciplines and at all levels. To this end the Network supports faculty development, curriculum design, assessment strategies, education research and systemic change. The Network is the professional organization serving and promoting collaborations among those students, educators, academic centers, educational institutions, professional societies and corporate partners sharing our vision. The Network also strives to keep issues of quantitative literacy at the forefront of national and international conversations about educational priorities.
