

1st & 2nd partial derivatives worksheet.

M Feb 24.
 2/18/6/10 Barrett

Contour lines of $f(x,y)$ shown.

$P = (a,b)$

Are the following, evaluated at point P, < 0 , $= 0$ or > 0 ?

f_x

f_y

f_{xx}

f_{yy}

f_{xy}

Hint: plot the 'traces' (slices) of $z = f(x,y)$ below:

Hint:
 $\frac{\partial}{\partial y}(f_x)$

SOLUTIONS

Contour lines of $f(x,y)$ shown.

$P = (a,b)$

Are the following, evaluated at point P, < 0 , $= 0$ or > 0 ?

$f_x > 0$

$f_y < 0$

$f_{xx} > 0$

$f_{yy} > 0$

$f_{xy} < 0$

ask: "how does f change when go in x or y directions?"

Hint: plot the 'traces' (slices) of $z = f(x,y)$ below:

Hint: $\frac{\partial}{\partial y}(f_x)$

harder: since f_x is smaller when increase $y=b$, its rate of change is < 0 , $f_{xy} < 0$

slice is concave up

slice is also concave up!
